Education

PDPM Indian Institute of Information Technology, Design and Manufacturing

JABALPUR, M.P

Bachelor of Technology in Computer Science and Engineering

11/2022 - 06/2026

Work Experience

One Assure

05/2026 - 07/2026

Software Development Intern

- Developed end-to-end quoteless and quoted insurance workflows for Health and Term Insurance using TypeScript and Golang, with multi-step application flows built on gRPC-based service communication.
- Implemented MFA-based proposal confirmation via OTP verification, integrating Kaleyra for OTP delivery with database-backed generation and validation.
- Built proposal submission and status-tracking workflows spanning the full application lifecycle, and enhanced existing quoted-insurance flows to improve quote selection.

Nexa Solutions LLC

01/2026 - 03/2026

Full Stack Developer Intern

- Designed and built responsive, full-stack websites for 5+ clients across industries using React.js, Node.js, and MongoDB, owning the complete lifecycle from requirement gathering to deployment, and developed RESTful APIs integrating authentication, payment gateways, and third-party services.
- Improved average page load time by 30% through code-splitting and asset optimization, while maintaining and enhancing live client websites – resolving 40+ bugs and delivering all projects within agreed timelines.

Fusion: ERP Portal of College | *ReactJS, Django, PostgreSQL* [Link](#)

08/2024 - 05/2025

- Architected a scalable ERP system supporting 500+ students, streamlining academic and administrative workflows.
- Implemented an Inventory Management module automating asset lifecycle tracking and improving resource visibility.

Research Experience

Schizophrenia Detection using EEG Signals

08/2024 - 08/2025

- Developed an attention-enhanced deep learning model (SEBlock, CBAM, ECA) for schizophrenia detection from EEG signals, improving classification accuracy by 14% over conventional CNNs.
- Achieved 92% subject-dependent and 85% subject-independent accuracy by converting EEG signals into scalograms and spectrograms; submitted for peer-reviewed publication in IEEE.

Android Malware Detection using Dynamic Analysis and Machine Learning

08/2024 - 04/2025

- Systematically evaluated dynamic vs. static analysis techniques on a standardized benchmark achieving up to **76% detection accuracy**, translating findings into a deployable behavior-based detection framework.

Projects

CareerHub | *React, TypeScript, Supabase, Vercel, GitHub Actions* [Link](#)

08/2026

- Developed a full-featured job portal that allows employers to publish openings and candidates to browse, filter, save, and apply to opportunities through a live database-driven workflow.
- Designed and implemented the complete recruitment lifecycle, including job posting, application submission, status tracking, resume-based matching, and production deployment with automated CI/CD.

SkillShare | *MERN, Clerk, Socket.io, ZegoCloud, RazorPay* [Link](#)

01/2026

- Built a full-stack MERN skill marketplace with Clerk authentication, secure payment processing, wallet integration, and end-to-end booking workflows.
- Implemented real-time chat and peer-to-peer video using Socket.io and ZEGOCLOUD, ensuring low-latency messaging and reliable session management.

MeritMaze | *ReactJS, NodeJS, MongoDB, OAuth, Vercel, Render* [Link](#)

03/2025

- Developed a collaborative learning platform with group study rooms, smart note-taking, community forums, and real-time progress tracking.
- Integrated an AI chatbot and adaptive quiz engine using the Gemini API to enhance personalized learning and engagement.

Technical Skills

Languages: C, C++, Python, Java, JavaScript, TypeScript, SQL, Go, HTML, CSS

Frameworks: React.js, Next.js, Node.js, Express.js, Three.js, Django, Tailwind CSS, Zustand, Recharts

Databases & Tools: MySQL, PostgreSQL, MongoDB, Docker, Git, GitHub, Postman, Anaconda, Android Studio

Coding Profiles: LeetCode
